CRISP DC

PDMP in the District of Columbia

What's New

In the past, Maryland allowed health care practitioners with DC licenses whose patients cross state borders to have access to view Maryland PDMP information to help facilitate coordination of care. **The DC PDMP now has full access to Maryland PDMP data through interstate data sharing.** In light of the evolution of PDMP availability in the District and your ability to access data through the DC PDMP, we are sunsetting all legacy accounts for practitioners registered with Maryland PDMP who are not licensed to practice in Maryland. You will be able to access the DC PDMP which contains the interstate data through CRISP after you complete an electronic Integration Request Form. Afterwards, you will be sent an End User License Agreement and Questionnaire from DC Health through their PDMP vendor, Appriss-there is no additional cost for this service.

Next Steps for Users

Below you will find the link to the electronic Integration Request Form, which is now required by DC Health for organizations that wish to utilize CRISP to view the DC PDMP. As you know, this tool allows healthcare professionals to review a patient's controlled-substance prescription history more quickly and efficiently. The statewide integration of the DC PDMP platform is a key component of the District's ongoing effort to address the opioid crisis.

Completing this form will ensure that your organization's providers, with correct licensing information on file, can continue to utilize the PDMP.

Please find the electronic form below with an example of how the Technical Information section should be completed. Under 'Primary Software Vendor,' please select CRISP.

*Please note, once the Integration Request Form (link above) has been completed, two emails are sent to the primary contact via HelloSign <noreply@mail.hellosign.com>. Each e-mail contains a required document, the Gateway End User License Agreement and the Gateway Licensee Questionnaire. The e-mails could arrive in SPAM/junk folders. The e-mails provide links to complete the documents. If the you click the link and don't complete the document, the link is deactivated; if the link becomes deactivated, Appriss needs to reactivate your link by resending the e-mail to you. The link also becomes deactivated after a certain period of time, and for every two weeks that the document is not completed, an automated e-mail reminder is sent to the primary contact from pdmpintegrations@apprisshealth.com.
