CRISP DC

Advancing PopHealth Analytics:
Empowering Healthcare Professionals for Better Patient Care in DC!

Unlock the Power of Data and Analytics, for enhanced healthcare in the District of Columbia. The PopHealth Analytics suite of reports is *your* gateway to secure access to healthcare data and robust analytical tools.
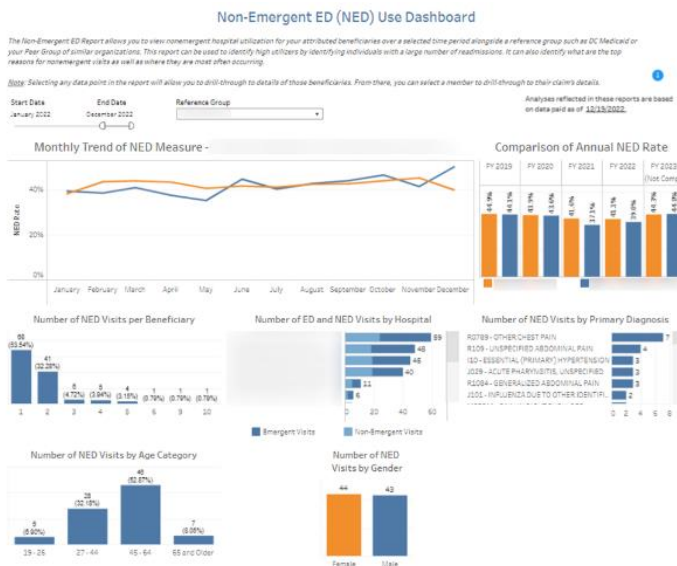

How Does PopHealth Analytics Benefit You?

PopHealth supports your analyses and interventions, assisting you in planning and developing care coordination efforts for various scenarios, including targeted chronic conditions and beneficiaries of interest.

The reporting suite includes several types of reports, such as:

- ✓ Population Navigator Tool
- ✓ Population Summary Reports
- ✓ Utilization and Quality Reports
- ✓ Pediatric Health Reports (EPSDT)
- ✓ CMS Core Set Measures Report
- ✓ Prescription Drug Reports

- ✓ Skilled Nursing Facility Report
- ✓ Medicaid Payment Reports
- ✓ Medicaid Redetermination Report
- ✓ HIV-related Utilization Reports
- ✓ Social Determinants of Health Map & Report

What Can You Achieve with Our Reports?

Our reports empower you to:

o Analyze patient demographics and metrics to better understand your patient population.

o Track your performance on nationally recognized quality measures.

o Transform data into clear visualizations for easy communication and collaboration across clinical and non-clinical settings.

Get Started with PopHealth Analytics Today!

Discover the full potential of your healthcare organization and drive better patient outcomes in D.C. with PopHealth Analytics. Get seamless access to this powerful data and analytics tool through the DC HIE Portal today.
