# CRISP DC HIPAA Authorization Form One Pager

*CRISP DC is excited to launch a new form within the CRISP DC Consent Tool to allow patients to consent to share their clinical data with non-HIPAA-covered providers!*

## What is the HIPAA Authorization form?

The HIPAA Authorization form is a form to be completed by a **HIPAA-covered provider** to release the patient's HIPAA-covered data (clinical data, medications, labs, and social needs data) to a non-HIPAA-covered provider like a **community-based organization (CBO)** that is providing treatment to the patient to address a need.

## Where can I access the HIPAA Authorization form?

The HIPAA Authorization form can be found within the **CRISP DC Consent Tool**. Once you are in the consent tool, you should see a list of different forms, you can click on the **HIPAA Authorization form** to complete it on behalf of the patient.

If you do not have access to the CRISP DC consent tool, please reach out to CRISP DC Outreach at dcoutreach@crisphealth.org.

## Who can access the HIPAA Authorization Form?

Any **HIPAA-covered provider** that is onboarded to use the CRISP DC platform can use the HIPAA authorization form.

## I am a HIPAA-covered provider, and I want to use the HIPAA Authorization form. What do I need to do?

1. Make sure that you have access to the CRISP DC Consent Tool
2. Consult with your patients if they want their HIPAA-covered data shared with non-HIPAA-covered entities
3. Begin submitting HIPAA authorization forms for your patients

## I am a CBO, and I want to see my patients' HIPAA-covered data to help provide them with care. What do I need to do?

1. Reach out to CRISP DC to get onboarded and complete the required paperwork
2. Begin submitting patient panels through the panel processor tile
3. Search for patients within CRISP DC that have a HIPAA authorization on file
4. See patients' clinical data to provide them with better care
