

Advance Care Planning in the District of Columbia

CRISP DC is empowering District providers with a free, cloud-based advance care planning (ACP) solution. Through the seamless integration of the CRISP DC HIE and MyDirectives' tool, MyDirectives for Clinicians, providers and patients can easily create digital ACP forms, such as DC MOST, National POLST, Universal Advance Directive (uADD), and Psychiatric Advance Directives. We ensure a smooth implementation with quick access, initial training, and dedicated ongoing support.

Create digital, legal forms at the point of care.

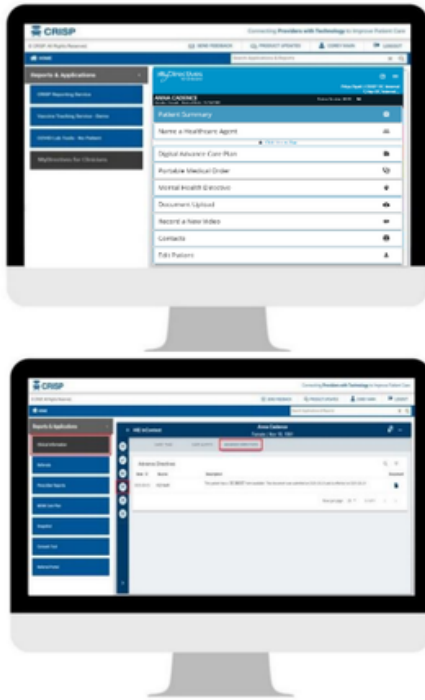

Upload and securely store existing forms.

Access and download forms from the CRISP DC HIE.

Track and report for billing, QI/QA, and compliance.

Streamlined ACP Management: Providers can create, upload, share, store, and view ACP documents and portable medical orders in person, via telehealth, or by referring patients for self-service.

Enhanced Interoperability: Enables streamlined access to ACP information across District providers and ambulatory providers at the point of care.

Empowered Patient Choice: Protects patient autonomy, minimizes unwanted treatments, and helps control medical costs.

Immediate patient access to a free MyDirectives.com account upon document creation or upload, plus educational materials.

Please contact CRISP DC at dcoutreach@crispdc.org for access and further details.

The advance care planning initiative is a partnership between DC Health and the DC Department of Healthcare Finance and made possible through the DC-designated Health Information Exchange, CRISP DC, using the MyDirectives for Clinicians tool by MyDirectives.
